

EZ-KLEEN PRESSURE REGULATING FILTER

The NEW EZ-Kleen Pressure Regulating Filter offers the following advantages:

- The EZ-Kleen pressure regulating filter products combine the self cleaning EZ-Kleen filter with a 25 psi (3/4" MPT) and 30 psi (1" MPT) hi-flow pre-set regulator. A one piece filter/regulator configuration reduces labor and material expense and allows for easier installation in tight spaces.
- All EZ-Kleen filters utilize an improved cleaning plate design that outperforms similar product brands when properly installed and maintained.
- The pre-set regulator features the Nelson Irrigation patented O-Ring dampening system for handling severe pressure surges, as well as a less restrictive plunger seat to help reduce plugging (Patent numbers 5257646 and 7048001).

The EZ-Kleen filter basin can be cleaned by removing the threaded cap, when the filter is not in operation.

Filter can be manually flushed while in operation via a retrofit ball valve, or automatically via a spring-loaded flush/drain valve.

SPECIFICATIONS

EZ-KLEEN 3/4" AND 1" FILTER WITH REGULATOR

HOUSING – Produced using high heat, high pressure and chemical resistant polypropylene material. Housing and basin connected using EPDM O-ring seal.

SCREEN – Constructed using woven 304 stainless steel 150 mesh with flexible PVC collars. Filtration area is 23 sq. in.

REGULATOR – 3/4" MPT regulating filter preset at 25 psi. 1" MPT regulating filter preset at 30 psi

BASIN DRAIN – 3/4" MHT outlet

MAXIMUM OPERATING PRESSURE – 120 psi.

MAXIMUM FLOW – 3/4" model 10 GPM. 1" model 18 GPM

Recommended minimum flow for efficient cleaning:

- 3/4" model 6 GPM
- 1" model 11 GPM.
