

Quality Products for Landscape & Agriculture

GRASS-CEL™ STRUCTURES

The Porous Grass Paver with Real Depth

Grow natural grass in these honeycomb pavers and combine the natural beauty of grass with the structural strength of Grass-Cel for:

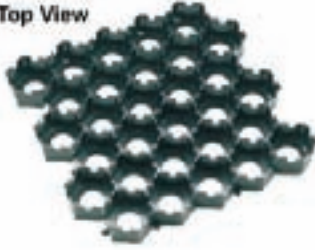

- High foot traffic areas
- Low usage driveways and service roads
- Emergency fire lanes
- Soil and slope stabilization
- Golf cart paths
- Golf courses
- Drainage layers
- Parking areas
- Roof gardens

GRASS-CEL™ SPECIFICATIONS

Top View

Bottom View

Dimensions:	*13" x 12" x 1-1/2"
Weight:	17 oz. per piece
Load Capacity:	70,000 lbs. per sq. ft.
Color:	Black
Structure:	30 hexagon cells, 1" opening at base with locking tabs and slots
Material:	High-impact polypropylene with UV inhibitors, 100% recycled material
Packaging:	360 pieces per pallet

EASY TO INSTALL

- Remove sod
- Level surface
- Install Grass-Cel Structures
- Replace sod or seed
- Press in with golf cart, tamper or roller

AESTHETICALLY PLEASING

- Eliminate the need for unsightly asphalt car paths
- Transform your heavy traffic areas into beautiful lawns

GRASS-CELL STRUCTURES

Grass-Cel is an exciting product that lends itself to many new techniques in landscape design. Now it becomes possible and practical to think in terms of wear areas, rather than paths or roads. Grass-Cel Structures can be installed only in areas that need it. The aesthetic beauty of many turfgrass areas is enhanced with Grass-Cel. The honeycomb structure of each piece is strong and durable.

Each honeycomb cell has a round opening at the base. Air, water and nutrients move through these holes to the soil below. Grass roots extend through these holes, binding the Grass-Cel Structures to the surface. The slots provided in the walls of each cell allow roots, stolons and rhizomes to move freely from cell to cell. The traffic is supported by the vertical walls of the honeycomb. Soil within the cell cannot be compacted by normal traffic.

For more information contact Landscape Products, Inc. at the address shown below.

For detailed installation information please refer to the GRASS-CEL INSTALLATION BROCHURE.

** Note: When pieces are interlocked, the area covered per piece approximates one square foot.*
