

HIGH QUALITY POLYETHYLENE & ALGAE RESISTANT PVC VINYL TUBING

High quality polyethylene & algae resistant PVC vinyl tubing manufactured by Landscape Products is ideal for use in drip irrigation systems for landscapes and agriculture.

All Polyethylene tubing (PE) is made using 100% Dow Chemical 7510 material, which has a 25+ year record of product quality. This material is known for having excellent environmental stress crack resistance (ESCR). A minimum of 2% carbon black color protects the tubing from the harmful effects of the sun. This tubing is ideal for use in drip irrigation systems for orchards, vineyards, home gardens and landscapes. Available in solid black, or with red, white or purple stripe.

Vinyl distribution tubing for emitter and micro sprinkler connections is made from the highest quality algae resistant PVC resins. Available in common and custom sizes.

POLYETHYLENE & ALGAE RESISTANT PVC VINYL TUBING
