

Swing Risers

Try Our Industry-Leading Swing Risers on Your Next Project

Landscape Products compression-style swing risers are made of 100 percent virgin material, pre-assembled and pressure tested for leak-free operation. They incorporate compression elbows that swivel on the swing pipe and provide flexibility on the riser—perfect for your next project!

Manufactured using the same quality materials, Landscape Products also offers conventional hard spiral barb style risers. Proudly manufactured in our state-of-the-art facility in Tolleson, AZ.

Spiral barb fitting style

- Available in 6 and 12-inch lengths.
- Reduced blow-off failure at high pressure over competitive products.
- Assembly fittings may be adjusted to address specific applications at the installation site.
- Available in various factory assembled lengths and configurations.

Compression fitting style

- Available in 7 and 13-inch lengths.
- Zero pressure loss across the fittings because the ID of the fitting is larger than the ID of the pipe.
- Easily field adjustable with only one contact point between the hose and the fitting.
- Available in various factory assembled lengths and configurations.
